

The 2021 Philippines COVID-19 Mobile phone survey, conducted by the Department of Health, was a national and older designed to produce comparable data on Non-Communicable diseases and their related risk factors.

The survey employed a two-phase sample design to produce key indicators for the country stratified by region. An implicit frame of all possible mobile phone numbers was generated via random digit dialing. In phase two, a total of 64,181 mobile phone numbers were dialed, of which 3,381 mobile phone users were screened,
